Abstract

I have completed 11 years schooling and one year college studies. Unfortunately, I could not continue my higher and advanced studies. After my marriage, this trotted my mind. I very much worried for not continuing my education. I went on sleeping on this problem. Then I arrived at a conclusion to do solid and concrete social services in the areas of education. In this short paper, I would like to share my experiences with the readers of this journal.

Keywords: School Education; College Education, Life Experiences

I hail from a remote village in India. In the nineteen fifties, there was not even an elementary school at our village. In 1953, when my father's elder brother Sri G. Shanmugasundaram was the president of Kanjampatti Panchayat board, an elementary school was established by the then Madras government. This school taught basic education from 1st standard to 5th standard. In 1961, a new building was constructed

by the then Madras government. The then Chief Minister of Madras province Honorable K. Kamaraj opened this new school premises. At that state function, the local people and the president Shri G. Shanmugasundaram appealed to the relevant Chief Minister to upgrade this school up to 8th standard. And this was immediately done by the state government.

When I became the president of our Kanjampatti Panchayat board in 1986, I worked hard and upgraded this school up to 10th standard. Then after gab of 7 years, I worked tirelessly with the provincial government and upgraded this school up to 12th standard.

For the upgrade of our village school, I had to travel to district and taluk head quarters and meet relevant officers. Sometimes, I had to visit our capital city for this purpose. On several occasions both officials and politicians detained me for a long period. But I never fed up with these sad phenomena and tolerated all these insults.

I have more than one acre land for the play ground of our school. I have collected a small amount and the remaining funds were contributed I or the purchase of this playground land. Apart from this, I have attempted successfully to get the sufficient monies gifted and allotted by the members of Tamil Nadu legislative assembly. And a remarkable fund from NA BARD was sanctioned for the infrastructures of computer class rooms.

Recently, a nice compound for our school was constructed by the efforts of our people and myself. And several modern facilities are being carried out at this school through my efforts and guide lines.

I am very happy to add that I have financially helped for some students to continue their higher and advanced studies. Also, I have worked very hard to get jobs for our village graduates and post graduates.

I have been President of the Parent Teachers Association of our Government Higher Secondary School at Kanjampatti continuously for more than 37 years! And I am also a member of SSA committee for our Pollachi area. This enabled me to upgrade a lot of village schools.

Considering these educational services, I have been appointed as Senator of Tamil Nadu Veterinary University Research Committee from 2018 to 2021. I have been executive committee member of Nachimuthu Community Polytechnic. This helped me marvelously to et jobs to the

surrounding poor village students and unemployed graduates.

For more and more particulars of my 45 years social services, our readers may refer to Ninety different social services of Sivasamy Soundararajan, *International Journal of Advance Research, Ideas and Innovations in Technology*, (Volume 7, Issue 1)

Besides, this the famous German journal also published my short article on this subjects. ^[2]

Very recently, the Prince of Wales applauded my social services/ This officious letter was include at the end of this article.
